RAISING THE BAR in Chronic Disease Prevention and Management

Third Annual Continuing Health Science Education Event

This workshop will be of interest to health care providers, administrators, and other relevant stakeholders who are interested in advancing the integration of evidence-based practices in chronic disease prevention and management across the continuum of care.

WORKSHOP OBJECTIVES:

1. To develop the skills for early recognition of chronic conditions and effectively manage these conditions within a busy practice; including how to:
 - incorporate comprehensive screening for select chronic conditions.
 - integrate effective chronic disease prevention and management into daily practice.
2. To develop the strategies and tools to use evidence-based care and continuous quality improvement within your practice.
3. To identify practical collaborative approaches to chronic disease prevention and management that provides seamless transitions across care settings.
